

Resourcing Group

Resourcing Group is a multi-branch recruitment solutions provider comprising of two brands, Community Resourcing and Technical Resourcing Solutions, and employs 29 full-time staff.

Resourcing Group provides temporary and permanent recruitment solutions to the Public Sector, specifically property and housing, across multiple disciplines.

The Challenge

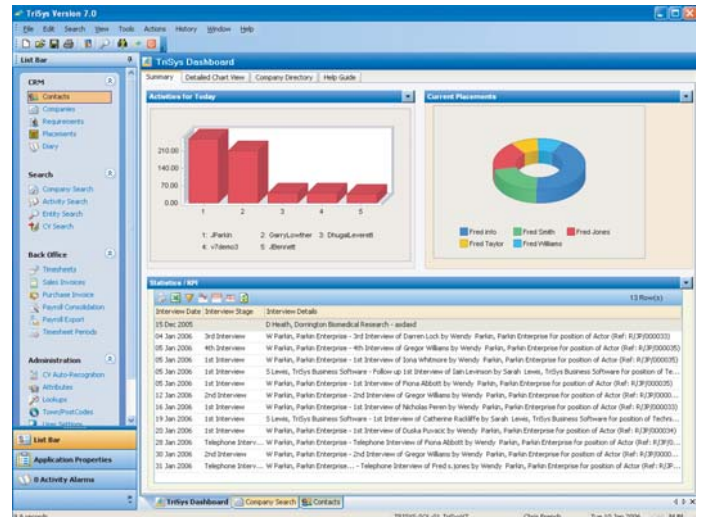

Resourcing Group aspired to achieving ISO 9001:2000 quality standard and required a fully functional, easy-to-use recruitment software solution to help drive the achievement of their goal. The recruitment software solution needed to help define the quality procedures for Resourcing Group. Enabling all interactions and communications to be logged, time-stamped and cross referenced to the relevant client and candidates in the system.

Resourcing Group also required the software solution to provide easy-to-use, customisable recruitment workflow in order to improve the efficiency and productivity of their recruiters and service levels.

They chose TriSys, a state of the art recruitment software solution, to manage client and candidate relationships. TriSys is used for all business critical information and offers a number of advanced searches, quickly matching candidates to vacancies. This functionality combined with the recruiters own knowledge proved really powerful.

"We needed a solution to improve the efficiency of our recruitment service. We chose TriSys"

- Nathan Colbourne, Managing Partner
Resourcing Group

The Journey

The recruiters at Resourcing Group come from a diverse background and had experience in using many other recruitment software solutions. After a thorough screening process, Resourcing Group decided TriSys was the only provider that could help them achieve their goal of ISO 9001:2000 quality standard and improve the productivity and efficiency of their recruiters.

TriSys also provided Resourcing Group with a reliable, affordable and easily customisable solution. The perfect recruitment software partner for managing clients, candidates and jobs. Moreover, TriSys easily and seamlessly integrated with the Back Office solution currently used by Resourcing Group.

The Results

TriSys has helped Resourcing Group achieve the following:

- A fully functional multi-relationship recruitment database.
- ISO9001:2000 quality standard.
- Dramatically reduced manual administration overhead and associated costs.
- Dramatically improved the performance, productivity and efficiency of their recruiters, allowing them to concentrate on developing relationships with clients and candidates.
