

Risk Management Solutions

Risk Management Solutions is part of the National Health Solutions Group, a multinational recruitment consultancy.

Risk Management Solutions specialises in the professional, corporate and industrial sectors across specialist fields in Risk, Health & Safety and Environmental.

The Challenge

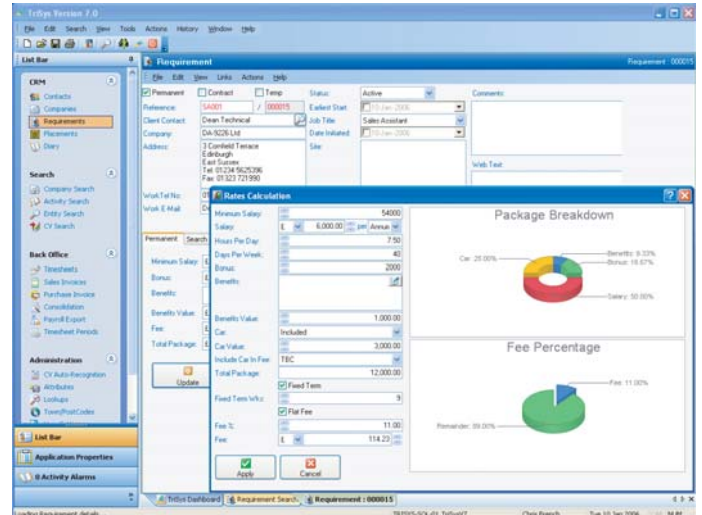

Risk Management Solutions was a newly created division within the National Health Solutions Group. After a complete overview of the company processes and current recruitment software, it was decided a new fully functional recruitment software solution was required. It had to be customisable and easy-to-use.

As Risk Management Solutions was a new division initial investment costs had to be kept to a minimum. More importantly the chosen solution had to improve upon the productivity of recruiters to increase revenue generation.

The Journey

National Health Solutions Group already had an incumbent recruitment software solution installed. Unfortunately, this software was tailor-made for the medical recruitment industry. Risk Management Solutions quickly discovered the functionality of this product made it hard to configure and achieve the requirements demanded by the new business.

The directors of Risk Management Solutions have a wealth of experience in the recruitment sector and had seen a multitude of recruitment software solutions. After a detailed evaluation process it was agreed that TriSys was the most compelling solution to meet the needs of Risk Management Solutions.

"TriSys enabled us to improve our productivity levels and increase sales.....I would personally recommend TriSys anytime"

- Nicholas Cavanagh, Sales Director
Risk Management Solutions

The Results

TriSys has helped Risk Management Solutions achieve the following:

- Instant ROI at a minimal cost.
- Dramatically improved productivity levels.
- Improved recruitment workflow and time organisation.
- Considerable increase in profitability.
