

TriSys Releases Mobile Recruitment Software for Apple iPhone and iPad

Cambridge, UK - 21 December 2010: TriSys Business Software, one of the UK's fastest growing software and services providers, has released the latest version of its mobile recruitment software specifically designed for the Apple iOS operating system running both iPhone and iPad devices.

TriSys Mobile is available today on the Apple App Store either on the iPhone or iPad devices, or via iTunes running on a PC or Mac.

TriSys ASP customers are invited to purchase and install this application to enable access via WiFi and 3G networks to their recruitment databases hosted in the cloud by TriSys Business Software.

"These two products further strengthen our extensive product and service portfolio and provide our customers with the ability to truly recruit on the move. Next month, we will add Android and Blackberry devices to the TriSys Mobile product suite." commented Garry Lowther, Chief Executive Officer, TriSys Business Software.

About TriSys Business Software
